

CURRICULUM VITAE

ALBERT DIAZ GUILERA

December 2016

Professional data

Current professional status and start date: Full Professor. 15/02/2011

Knowledge area: Condensed Matter Physics.

Affiliation: University of Barcelona. Departament de Física de la Matèria Condensada & Institute of Complex Systems (UBICS)

URL: <http://www.diaz-guilera.net>

Diplomas

PhD in Science (Physics) Universitat Autònoma de Barcelona, March 1987.

Thesis Director: Dr. J. M. Rubí.

Score: Apto *Cum Laude*.

Publications in Journals

I have published more than one hundred papers in international journals according to Web of Science (WOS), which have been cited 5320 times and make an *h*-index of 27. Most of them are publications in journals of the first quartile. Here is the list of my publications during 2001-2016 and mark with (*) the most relevant ones. In brief, I have published close to 60 articles during the last 15 years in the field of complex networks, with an average production of 4 papers per year, many of them seminal in the field. These scientific contributions have deserved a large number of citations, with a mean of more than 50 per paper.

Synchronization in networks of mobile oscillators. PHYSICAL REVIEW E 83, 25101 (2011) [DOI](#)
A first article from our group focused on one of the most prominent lines of research in complex networks: evolution of time-dependent networks and intertwining of the dynamic properties of the units with the network itself. This line of work has a direct impact on how large groups of living systems can cooperate to form complex dynamical patterns across a broad range of length scales, from the macroscale - such as flocks of birds - down to the microscale - such as a suspension of cells synchronizing their genetic clocks.

Synchronization in complex networks. PHYSICS REPORTS-REVIEW SECTION OF PHYSICS LETTERS 469 (2008) [DOI](#)
One of the best liked and cited reviews from our work, with more than a thousand citations over six years. It deals with the emergent phenomena of synchronization in a wide variety of topological patterns. Synchronization has become one of the paradigmatic examples of complex systems behavior in the last decades.

Synchronization reveals topological scales in complex networks. PHYSICAL REVIEW LETTERS 96, 114102 (2006) [DOI](#)
The first publication in the field, with a thorough analysis of the relation between topological and temporal scales in the evolution of a population of identical oscillators towards a synchronized state. It explores a surprisingly simple analogy between eigenvalues of the Laplacian matrix of a network and the formation of synchronized communities. It is one of my most cited contributions even though it is not a review paper, with close to 400 citations.

Books

Chapters of books: 21 (research) + 1 (teaching)

Books: 1 (research, as editor), 4 (teaching, as author). Highlights:

- Xarxes Socials: Fonaments i Aplicacions (with A. Canals, J.L. Molina i B. Patraca) Editorial UOC, Barcelona, 2013.
- Statistical Mechanics of Complex Networks, editor. Proceedings of the Conference "Statistical Mechanics of Complex Networks", Sitges, Spain, June 2002, Springer (2003)

Supervised PhD thesis:

- Àlvaro Corral (1995). Senior researcher at Centre de Recerca Matemàtica, Bellaterra, Barcelona, SPAIN.
- Xavier Guardiola (2001). Senior data scientist at King, Barcelona.
- Roger Guimerà (2002). ICREA Professor at Universitat Rovira i Virgili, Tarragona, SPAIN.
- Mateu Llas (2004). High school teacher, Lleida
- Leon Danon (2006). Lecturer at the School of Social and Community Medicine, University of Bristol, UNITED KINGDOM.
- Luce Prignano (2012). Postdoc at Universitat de Barcelona, SPAIN.
- Oleguer Sagarrà (2016). Data scientist at DRIBIA, Barcelona, SPAIN.
- Current PhD candidates under supervision: Roberta Amato, Ignacio Morer, Antoni Miranda, Gemma Rosell.

Long stays in other institutions

During my career at Universitat de Barcelona, I have been awarded two sabbatical leaves, which I have used to interact with scientists of very different backgrounds, which have increased my personal interdisciplinary perspective of research:

- 2002 (3 months): Department of Mathematics, Imperial College London.
- 2002 (4 months): Harvard Medical School, Harvard University
- 2008 (2 months): Computational Social Science, ETH Zürich
- 2009 (12 months): Potsdam Institute of Climatology
- 2010 (3 months): Department of Psychology, Potsdam University
